

# Take control of energy costs with specialised finance

Long term, low cost asset finance for energy efficient assets.

Verdia manages a national network of accredited energy equipment and service providers, that meet the highest standards of quality and integrity in the industry. Only Verdia partners can offer Westpac Energy Efficient Finance to their customers.

## Long term, low cost finance

Westpac Energy Efficient Finance is supported by \$200 million from the Clean Energy Finance Corporation. Benefits include:

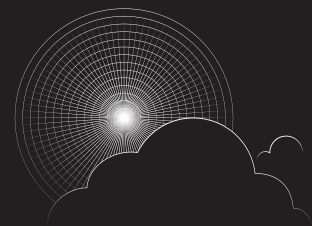

- Finance can be arranged over longer terms, at a lower cost and with no upfront cash investment
- Energy cost savings typically exceed the monthly finance payments, providing an immediate cash flow benefit
- Customers can choose from a range of Westpac equipment finance options, to suit their business needs and accounting requirements.

## Independent expertise for your project

The Verdia team includes experts in financing energy efficient and distributed generation equipment; together with engineers and project directors who've led hundreds of successful, large-scale energy projects across Australia and the world.

Before qualifying for Westpac Energy Efficient Finance, all projects are independently assessed by Verdia to confirm that the energy savings calculations are realistic.

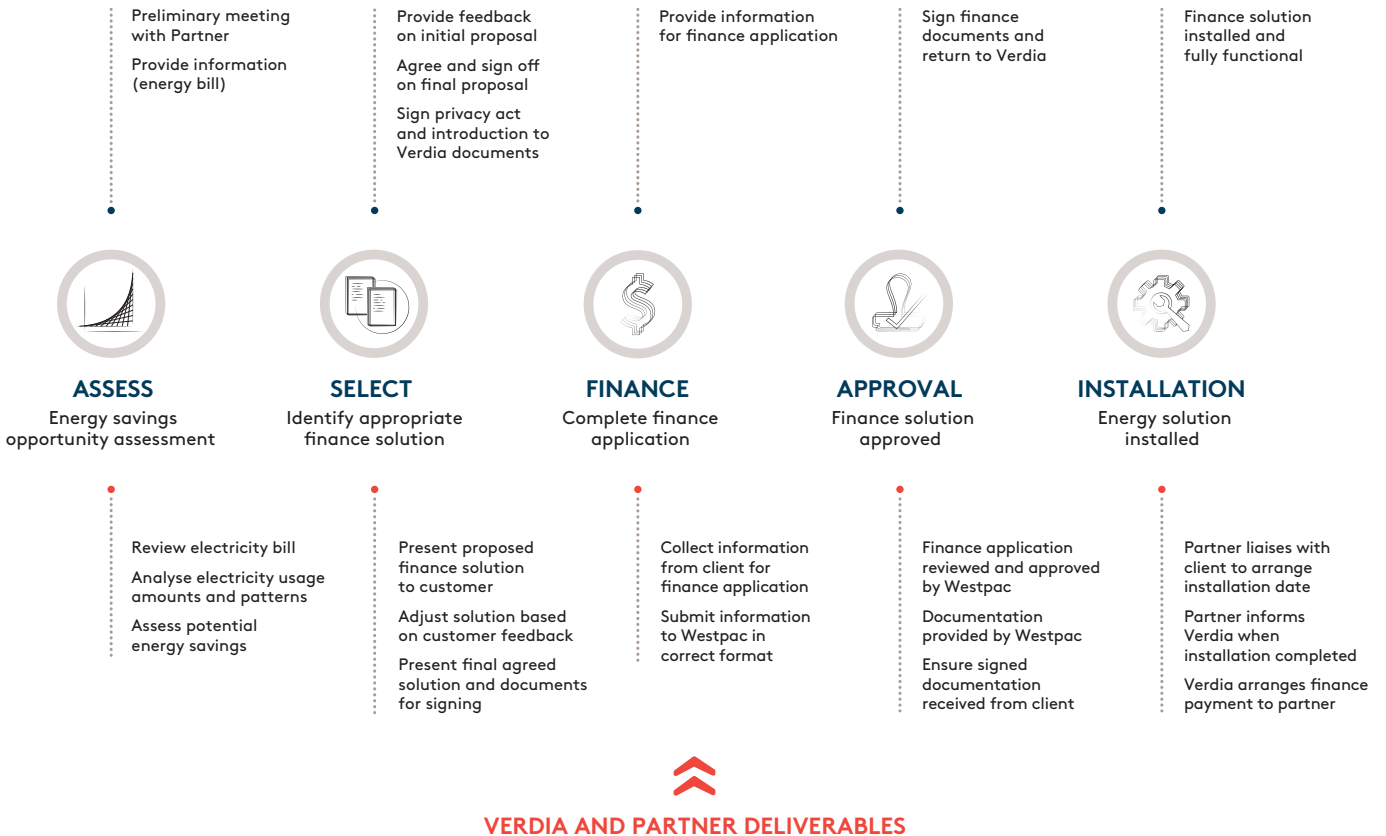

It's time to change the way we think about energy. Take control of energy costs and be part of a brighter, cleaner future.

# How it works

Working with Verdia to apply for Westpac Energy Efficient Financing is straightforward.
